

SIX MONTHLY COMPLIANCES TO ENVIRONMENTAL CLEARANCE

FOR THE MONTH FROM APRIL-2022 to SEPTEMBER-2022

OF

**Development of an Affordable Housing Project
Over 20.21 Acres at Chandrasekharpur,
Bhubaneswar with (G+4) Residential Buildings**

M/s Paramitra Smart Infra Pvt. Ltd.

At: Chandrasekharpur, Bhubaneswar, Odisha.

S. No.	Stipulated Conditions	Compliances
	Part- A: Specific conditions	
1	Consent to Establish/operate for the project shall be obtained from the state Pollution control Board as required under the Air (prevention and control of Pollution) Act, 1981 and the water (Prevention and control of pollution) Act, 1974.	The unit has obtained Consent to Establish from OSPCB vide order No. 5214/IND-II-CTE-6302 On dated 30.05.2019. CTE Letter attached as Annexure-1.
2	The approval of the competent authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc, as per national building code including protection measures from lightning etc.	Agreed, will take statutory clearance/approval/permissions from the concerned authorities as and when required. Structural stability Certificate, have been obtained already. Any other approval if required will be obtained in respect of the project from time to time as and when required. Structural stability Certificate attached as Annexure-2.
3	The project proponent shall obtain all necessary clearance/permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.	Agreed, will take statutory clearance/approval/permissions from the concerned authorities as and when required. Clearances as required from OSEIAA, PHED, BDA, CESU, have been obtained already. Any other approval if required will be obtained in respect of the project from time to time as and when required. ALL STATUTORY CLEARANCES ARE GIVEN IN ANNEXURES. Annexure-3: EC Clearance from SEIAA. Annexure-4: Permission letter from PHED. Annexure-5: Approved Layout Plan with letter from BDA Annexure-6: Fire recommendation Annexure-7: AAI Approval
	Topography and Natural drainage	
4	The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to	Will be taken care of. Proper rain water harvesting system, as recommend by SEAC, will be implemented at site. The provisions for storm water control and

	<p>obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-wastes, landscapes and other sustainable urban drainage system (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water. Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and should be done.</p>	<p>its reuse are being implemented during the construction and post construction phase which will meet the standards of CGWB and BIS. Maintain the natural slope of the project site for easily flow of rain water and drainage water from the proposed site. We will provide captive sewage treatment Plant having adequate capacity followed by zero disposal norms in dry season.</p>
	<p>Water Requirement, Conservation, Rain water Harvesting, and Ground water Recharge:</p>	
5	<p>As proposed, fresh water requirement from PHED water supply shall not exceed 938 KLD. No tapping will be done without due permission.</p>	<p>Water is being supplying through tankers to meet the requirement during construction phase. During operation phase, water supply will be provided through the authorized agency PHED. Requirement of fresh water will be depending on the water requirement after the modification of proposed project units on the basis of requirement on daily basis. DETAILS OF WATER REQUIREMENT GIVEN IN ANNEXURE-8. During monsoon season surplus treated waste water will be discharge to Nearest Municipal Drain. The permission from Public Health Department has been granted vide letter no. 10267 dated 06/09/2018. DETAILS OF RAIN WATER HARVESTING PLAN GIVEN IN ANNEXURE-9</p>
6	<p>A certificate shall be obtained from the local body Supplying water, specifying the total annual water Availability committed, the with the local authority, the quantity of water already quantity of water allotted to the project under consideration balance water available. This should be specified</p>	<p>Will be taken care of. Agreed, all the conditions stipulated by the Bhubaneswar Development Authority (BDA) are strictly followed. all the conditions stipulated by the Bhubaneswar Development Authority (BDA) in its approval of external infrastructure such as storm water drainage, sewage disposal and road construction are being followed.</p>

	separately for ground water and Surface water Sources, ensuring that there is No impact on other users'	
7	The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the regional office, MoEF & CC and SEIAA, Odisha along with six monthly monitoring reports.	Half yearly compliance report on post environmental monitoring will be submitted to SEIAA, Odisha as per Schedule.
8	Installation of dual pipe plumbing for supplying fresh water for drinking, cooking, and bathing etc. and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.	Yes we will provide dual pipe plumbing for supplying fresh water for drinking, cooking, and bathing etc. and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc.
9	Use of water saving devices/ fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc.) for water conservation shall be incorporated in the building plan.	Yes, We will complied Agreed, will take safeguard measures subsequently, if found necessary as and when required. Low flow type fixtures for showers, toilets flushing and drinking is being used to reduce wastage of water.
10	Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.	The dual plumbing line will be adopted during the building construction for separation of grey and black water.
11	Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.	The maximum possible pre-mixed concrete will be used in construction to reduce water demand.
12	The local bye-law provisions on rain water harvesting should be followed. If local by-law provision is not available, adequate	The local bye-law provisions on rain water harvesting will be followed . Agreed, all the conditions stipulated by the Bhubaneswar Development Authority (BDA) are strictly

	provision for storage and recharge should be followed as per the ministry of Urban Development model building Byelaws, 2016. As proposed (07) Nos. of rain water harvesting recharge pits shall be provided.	followed.
13	Any Ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering. The proponent shall also obtain permission from Water Resources Department, Govt. of Odisha for Drawl of water.	The requirement of drinking water will be met from PHED. Appropriate management of ground water withdrawal (During Operation phase for drinking purpose) will be done and in this case as per the approval and guidelines of CGWA and formal approval shall be obtained from CGWA If needed; permission will be taken from the Water Resources Department, Government of India and Government of Odisha as per the requirement.
14	A complete Plan for rainwater harvesting so as to harvest the Quantum of rain water at the proposed site during The rainy days equal to the total quantity of water to be consumed for various usages by the Building project in a full year shall be drawn up and implemented.	Yes we will comply.
	Solid waste Management:	
15	The provisions of the solid waste (management) rules, 2016, E-Waste (Management) Rules, 2016, and the plastics waste (management) rules, 2016 shall be followed.	Agreed, measures for prevention, control and mitigation of Air Pollution, Water Pollution, Noise Pollution and Land Pollution including solid waste management are being followed. <ul style="list-style-type: none"> • Major part of work of structure has completed at site and now there is minimal noise pollution within 65 db and with minimal of Air and water pollution. • Water is being be sprayed on compacted areas and access roads to reduce dust pollution particularly during the dry seasons. • Trucks carrying construction material and waste to and from the project site are covered with tarpaulins. •
16	Disposal of muck during construction phase shall not create any adverse effect on the	Agreed, safe disposal of muck with necessary precautions has been taken to prevent any adverse effect.

	neighboring Communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.	
17	Separate wet and Dry bins must Be provided in each Unit and at the ground level for Facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials. Wet Garbage Shall be composted in Organic Waste Converter. Adequate area shall be provided for solid waste management within the premises Which will include area for segregation, composting. The inert waste from group housing project will be sent to dumping site.	The solid waste generated is being properly collected and segregated and handed over to BMC for ultimate disposal Solid Waste (Management & Handling) Rules, 2016.
18	Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.	Hazardous waste like used oil, discarded paints and colors containers will be disposed off as per Hazardous waste (Management, Handling, Tran boundary Movement) Amendment Rules 2010
19	A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the Municipal Solid Waste generated from project shall be obtained.	Will be compiled.
	Sewage Treatment Plant:	
20	Sewage shall be treated in the STP of capacity 1400 KLD with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, gardening and DG Cooling. As proposed, excess treated water shall be used for nearby construction site or will discharge to municipal sewer with	STP having capacity 1400 KLD will be constructed.

	prior permission of competent authority.	
21	A Certificate from the competent authority shall be obtained for discharging treated effluent untreated effluents into the Public sewer/ disposal/drainage systems along with the final disposal point.	During monsoon season surplus treated waste water will be discharge to Nearest Municipal Drain. The permission from Public Health Department has been granted vide letter no. 10267 dated 06/09/2018.
22	No sewage or untreated effluent water would be discharged through storm water drains.	There will be separate pipe line for disposal of surplus treated waste water and excess storm water.
23	The installation of the sewage treatment plant shall be certified by an independent expert and a report shall be submitted to the SEIAA, Odisha before the project is commissioned for operation. Necessary measures should be made to mitigate the odor problem from STP.	Will be compiled. After completion of civil design for proposed STP, permission will be taken from the independent expert and a report shall be submitted to the SEIAA, Odisha before the project is commissioned for operation. Necessary measures should be made to mitigate the odor problem from STP.
24	Sludge from onsite sewage treatment, including septic tank, shall be collected, conveyed and disposed as per the ministry of urban development, central public health and environmental engineering organization (CPHEEO) Manual on sewerage and sewage Treatment Systems, 2013.	Will be taken care of.
	Energy conservation:	
25	Compliance with energy conservation building code (ECBC) of Bureau of energy efficiency shall be ensured. Buildings in the states which have notified their own ECBC, shall comply with the state ECBC . Outdoor and common area lighting shall be LED. Concept of	Will be submitted Considered in the design proposal.

	<p>passive solar design that minimize energy consumption in buildings by design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof u-values shall be as per ECBC specifications.</p>	
26	<p>Energy conservation measures like installation of CFLs/ LED for lighting the area outside the building should be integral part of the project design and should be in place before project commissioning. Used CFLs, TFL and LED shall be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.</p>	<p>Will be submitted Considered in the design proposal.</p>
27	<p>Solar, wind or other renewable energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level, / local building by-laws requirement, whichever is higher. Follow super ECBC requirement of ECBC 2017 and provide compliance report.</p>	<p>Will be submitted Considered in the design proposal.</p>
28	<p>Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential</p>	<p>Will be submitted Considered in the design proposal.</p>

	buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.	
29	Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include fly ash bricks, hollow bricks, ACs, fly ash lime gypsum blocks, compressed earth blocks, and other environmental friendly materials. Fly ash should be used as building material's in the constructions per the provision of fly ash notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016 . Ready mixed concrete must be used in building construction.	Will be submitted Considered in the design Proposal
	Air Quality and Noise:	
31	Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for building as well as site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3 meter height). Plastic/ tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murrum and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site. Sand, murrum, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution. Wet jet shall be provided	Agreed, measures for prevention, control and mitigation of Air Pollution, Water Pollution, Noise Pollution and Land Pollution including solid waste management are being followed during construction as well as during operation phase .

	for grinding and stone cutting. Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.	
32	All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the construction and demolition waste rules, 2016. All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.	As per provisions of National Building Code (NBC)-2005, we will be managed as per the provisions of the construction and demolition waste rules, 2016. All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
33	Notification GSR 94 € dated: 25/01/2018 of MoEF & CC regarding mandatory implementation of dust mitigation measures for construction and demolition activities for projects requiring environmental clearance shall be compiled with.	Will be taken care of.
34	The Gaseous emissions from DG Set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG Sets to mitigate the noise pollution. Low sulphur diesel shall be used. The location of the DG sets and exhaust pipes height shall be as the provisions of the CPCB norms.	All DG sets will be enclosed type conforming to the environment Protection (EP) rules 1986. Height of D.G stack will be following the CPCB guidelines.
35	For indoor air quality the ventilation provisions as per national building cod of India shall be provided.	We will complied
36	Ambient noise shall confirm to residential STANDARD BOTH DURING DAY AND NIGHT AS PER	Agreed, measures for prevention, control and mitigation of Air Pollution, Water Pollution, Noise Pollution and Land Pollution including

	<p>THE NOISE POLLUTION (CONTROL AND REGULATION) RULES, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB/SPCB.</p>	<p>solid waste management are being followed.</p>
	<p>Green Cover:</p>	
37	<p>No tree cutting/ transplantation of existing trees have been proposed in the instant project. A minimum of 1 tree for every 80 m² of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping. As proposed 10,654.89 m² area (21% of plot area) shall be provided for green area development.</p>	<p>Agreed, will take statutory clearance /approval/permissions from the concerned authorities as and when required. We will provide green belt as per MoEF guide lines .</p>
	<p>Top soil preservation and Reuse:</p>	
38	<p>Topsoil should be stripped to a depth of 20 Cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.</p>	<p>The excavated top soil generated during construction activities is stored in a safe place to avoid erosion. This will be used in plantation within the project site</p>
	<p>Transportation:</p>	
39	<p>A comprehensive mobility plan, as per Ministry of Urban Development Best practices guidelines (URDPFI), shall be</p>	<p>Agreed, all the conditions stipulated by the Bhubaneswar Development Authority (BDA) in its approval of external infrastructure such as storm water drainage, sewage disposal and road</p>

	<p>prepared to include motorized, non- motorized, public and private networks. Road should be designed with due consideration for environment, and safety of users. The road systems can be designed with these basic criteria:</p> <ul style="list-style-type: none"> • Hierachyof roads with proper segregation of vehicular and pedestrian traffic. • Traffic calming measures. • Proper design of entry and exit points. • Parking norms as per local regulation. 	<p>construction are being followed. Vehicles having pollution checked certificates are engaged for the construction work and are operated only during non-peak hours.</p>
40	<p>A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads with a 05 Kms radius of the project is maintained and improved upon after the implementation of the project.</p>	<p>A detailed traffic management and traffic decongestion plan has been prepared and vetted by reputed institute. Traffic study report is attached as Annexure-10.</p>
41	<p>This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 5 kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State urban development department and the P.W.D / competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.</p>	<p>We will complied</p>
42	<p>Vehicles hired for bringing construction material to the site</p>	<p>Vehicles having pollution checked certificates are engaged for the construction work and are</p>

	should be in good condition and should have a pollution check certificate and should confirm to applicable air and noise emission standards be operated only during non-peak hours.	operated only during non-peak hours.
	Environment Management Plan:	
43	An Environment management plan (EMP) shall be prepared and implemented to ensure compliance with environmental conditions specified above. A dedicated environment monitoring cell with defined functions and responsibility shall be put in place to implement the EMP. The environmental cell shall ensure that the environment infrastructure like STP, Landscaping, RWH, Energy efficiency and conservation, water efficiency and conservation, solid waste management, renewable energy etc. are kept operational and meet the required standards, The environmental cell shall also keep the record of environment monitoring and those related to the environmental infrastructure.	<p>Agreed, all the conditions stipulated by the Bhubaneswar Development Authority (BDA) as well as given in Form-1, Form-1A, and Environment Management Plan (EMP) are strictly followed.</p> <p>Measures for prevention, control and mitigation of Air Pollution, Water Pollution, Noise Pollution and Land Pollution including solid waste management are being followed.</p> <ul style="list-style-type: none"> • Major part of work of structure has completed at site and now there is minimal noise pollution within 65 db and with minimal of Air and water pollution. • Water is being be sprayed on compacted areas and access roads to reduce dust pollution particularly during the dry seasons. <p>Trucks carrying construction material and waste to and from the project site are covered with tarpaulins.</p>
	Others:	
44	Provisions shall be made for housing of construction Labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.	Temporary housing structure has been provided inside the site the labours and workers. However most of laborers are from the nearby areas, thus they do not need accommodation facility expect drinking water and toilet
45	A first aid room shall be provided in the project both during construction and operations of the project.	A First-Aid room has been provided in the project.

46	The company shall draw up and implement corporate social responsibility plan as per the company's act of 2013.	We will complied																		
47	As per the MoEF & CC, Govt. of India office memorandum F. No. 22-65/2017-IA.III dated 1st May 2018, the project proponant is requires to prepare and implement corporate environmental responsibility. Plan. As per para 6(II) of the said O.M appropriate funds shall be earmarked for the activities such as infrastructure creation for drinking water supply, sanitation, health, education, skill development, roads, cross drains, electrification including solar power, solid waste management facilities, scientific support and awareness to local farmers to increase yield of crop and fodder, rain water harvesting, soil moisture conservation works, avenue plantation. Plantation in community areas etc. The activities proposed under CER shall be restricted to the affectyed area around the project. The enrire activities proposed under the CER shall be treated as project and shall be monitored. The monitoring report shall be submiited to the regional office as a part of half yearly compliance report, and to the district collector. It should be posted on the website of the project proponant.	<p>The below mentioned expenses has been done under the heads of CER through the firm named "M/s Paramitra Smart Infra Pvt. Ltd.</p> <table border="1" data-bbox="837 491 1362 779"> <thead> <tr> <th colspan="3">CER</th> </tr> <tr> <th>SL. TOTAL	194.77	25.442																											
3	Officials from the regional office of MoEF & CC, Bhubaneswar who would be monitoring the implementation of Environmental safeguards should be given full cooperation, facilities and documents/ data by the project proponents during their inspection.	Yes we will agreed																											
4	In the case of any changes in the scope of project, the project would require a fresh appraisal by the SEIAA, Odisha.	Yes we will agreed																											
5	The SEIAA, Odisha reserves the right to add additional safeguard measures subsequently, if found necessary, and to take action including revoking of the environmental (protection) Act, 1986, to ensure effective implementation of the suggested safeguard measures in a time bound and satisfactory manner.	Noted We will take safeguard measures subsequently, if found necessary as and when required.																											
6	All other statutory clearances such as the approvals for storage of diesel from chief controller of explosives, fire department, civil aviation department, the forest conservation act, 1980 and the	Agreed, will take statutory clearance /approval/permissions from the concerned authorities as and when required.																											

	wildlife (protection) act, 1972 etc. shall be obtained as applicable by project proponents from the respective competent authorities.	
7	These stipulations would be enforced among others under the provisions of the water (prevention and control of pollution) Act, 1974. The air (prevention and control of pollution) Act, 1981, the environment (protection) Act, 1986, the public liability (insurance) Act, 1991 and the EIA notification, 2006.	Noted for action
8	The project proponent shall advertise in at least two local newspapers widely circulated in the region, one of which shall be in the vernacular Language Informing that the project has been accorded Environmental Clearance And copies of clearance letters are available with the State Pollution Control Board And may also be seen on the website of the SEIAA, Odisha. The Advertisement shall be made within Seven days from the date of receipt of the Clearance letter and a copy of the same shall be forwarded to the Regional Office of MoEF & CC, Bhubaneswar	Bing Complied
9	Any appeal against this clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.	NO
10	A copy of the clearance letter shall be sent by the proponent to concerned Panchayat, ZillaParisad/Municipal Corporatlon, Urban Local Body And the Local NGO, if any, from	Compiled.

	<p>whom suggestions/representations, if any, were received while processing The proposal. The clearance letter shall also be put on the website of the company by the proponent.</p>	
11	<p>The proponent shall submit/upload six monthly reports on the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall also update the same on the website of MoEF & CC periodically. It shall simultaneously be sent to the Regional Office of MoEF & CC, the respective Zonal Office of CPCB and the SPCB. The Criteria pollutant levels namely; SPM, RSPM, SO₂, NO_x (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the project shall be monitored and displayed at a convenient location near the main gate of the company in the public domain.</p>	Complied
12	<p>The environmental Statement for each financial year Ending 31" March in Form-V as is mandated to be submitted by the project proponent To the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules 1986, as Amended subsequently, shall also be Put on the website of the company along with the status of compliance of EC conditions and shall also be sent to the respective Regional Offices of MoEF & CC by E-mail.</p>	Will be compiled.

LIST OF ATTACHMENT

ATTACHMENT -I	Six monthly average monitoring data for Ambient Air Quality
ATTACHMENT -II	Six monthly average monitoring data for Water Quality
ATTACHMENT -III	Six monthly average monitoring data for Noise Level
ATTACHMENT -IV	Six monthly average monitoring data for Soil Quality
